Interview Transcript – Kevin Kemp

- Kevin Kemp Yeah, so, um, I'm not shooting today but I just, it's the last day and I really wanted to be here with everybody so, I wanted to be here and kind of enjoy it and then we've got the wrap party so that's going to be good (laughs).
- Interviewer So you're sitting in the audience obviously.
- Kevin Kemp Yeah, I've brought my family with me to be extras – supporting artists – so, um, yeah that's nice 'cause they get to be part of it as well.
- Interviewer Fantastic.
- Kevin Kemp It's been brilliant, I've wanted to go to India all my life, so to go with just, a real live kind of thing made solid, which I am so happy about, and I think we got to work with locals and I got to meet locals in a much better way than I would have done if I was back-packing or something like that because we actually got a working relationship with them, got to hang out with them. So, on the side of making the film, which obviously is brilliant, we got to do things which I would never get to do normally in my life so the whole thing has been great and I think we've had such a brilliant team, um, it's just made it fantastic, so, yeah, it's been amazing.
- Interviewer But what about the film? Do you think all the fun and the hard work and everything is going to come together in producing something that will be...
- Kevin Kemp I think so. Having watched some of the rushes I think that Dave's done such a beautiful job on so many of the scenes they look beautiful, and having watched a couple of the guys in their performances I think there's some really beautiful stuff been done, um, so from now I think it's really exciting, and obviously it down to the editor to pick and choose but, oh, I hope so.

Interview Transcript – The Jive Aces (continued)

Kevin Kemp When I first read this script I thought it was great so, and having seen what people have done with it, yeah, I think it's going to be fun, I think it's going to be very good, I'm very excited (laughs).
